

LECLERC XLR

KNDS

/ LECLERC XLR

key features

Mission

Since coming into service, the Leclerc has included many features and capabilities that other main battle tanks are just beginning to integrate.

The Leclerc tank will be modernized as part of the SCORPION program to amplify its operational capability and make it even better tomorrow.

Survivability

Complete modular and regenerative armored protection

Anti-RPG protection kit to improve the operational capacity of the tank in urban areas

Galix Close Defence Protection System®

Mine and EPI Protection Kit

Anti-IED Jammers BARAGE

Mobility

Off-road speed/ trail: 72km/h

High mobility performance due to unmatched weight/power ratio (24HP/ton), hydropneumatic suspensions and 1500HP motor with automatic transmission

Day and night mobility and combat capabilities

On-board inertial navigation system (GPS independent)

Integration of a GPS Packed in ammunition

Observation

Commander Hunter/Killer Day/Night stabilized panoramic view

Firepower

120mm, 52 Caliber Smooth Bore Gun

Programmable ammunition firing capability (multi-mode including airburst)

Electric turret control and stabilization system

Automatic loading system allowing shooting at high speed and a crew of 3 men

Two secondary armaments including 12.7mm coaxial and a SCORPION 7.62mm teleoperated turret

Equipement

SICS Command Assistance System

Integrated SCORPION Vetronics

Automatic fire suppression system

Fully digital system, and high-performance digital fire control system

CBRN Filtration & Air Conditioning
